

BACTERIAL GROWTH MEDIA

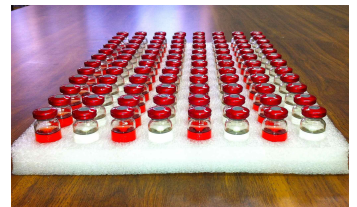

Ecolyse offers a variety of specialized bacteria media for the Oil & Gas industry. Ecolyse media is manufactured in accordance with NACE, ICorrST and API recommendations. Our media and media kits will allow you to quickly and effectively determine the presence of microorganisms responsible for microbial influenced corrosion (MIC) in oil field process water and cooling systems.

MPB - Modified Postgates B Broth

- For the enumeration of Sulfate-Reducing Bacteria (SRB)
- Media contains precipitated salts

PRD - Phenol Red Dextrose

- For the enumeration of Acid-Producing Heterotrophic Bacteria (APB)

MPB and PRD suitable for microbial monitoring in oilfields to NACE Standard TMO194-04

SRB/2 - Sulfate-Reducing Bacteria Broth 2

- For the enumeration of Sulfate-Reducing Bacteria (SRB)
- Media contains no precipitated salts.

IRB - Iron Reducing Bacteria Broth

- For the enumeration of Iron Reducing Bacteria (IRB)

NRB - Nitrate Reducing Bacteria Broth

- For the enumeration of Nitrate Reducing Bacteria (NRB)

TRB - Thiosulfate Reducing Bacteria Broth

- For the enumeration of Thiosulfate Reducing Bacteria (NRB)

Media is sold in:

- Boxed media kits (12 bottles)
- Case of 288 bottles (3 flats)
- CombiKit (MPB/PRD & field supplies)
